

MAKING YOUR WORLD STRONGER

Water Use Policy

JBS is dedicated to the responsible stewardship of the natural resources required to produce our products and feed millions of families around the world. Companywide, our approach to water stewardship is defined at the corporate level, but goals and targets are set by each facility to ensure ownership and accountability. We work closely and collaboratively with federal, state and local municipalities to address complex issues and jointly develop solutions. Finally, every facility invests capital annually to make sure it stays in alignment with and committed to our Environmental Policy while appropriately addressing local challenges. Water plays an important role in producing safe food. This necessitates its everyday use so we are meeting the highest food safety standards. To ensure that our water conservation efforts do not interfere with food safety, we work cross-functionally with our environmental, engineering, operations and food quality and safety teams when designing and implementing these strategies.
